integral 2GO HsM

The most precise **digital** dosing system in its class

integral 2GO HsM

Smart dosing technology.

Powerful, highly concentrated cleaning agents meet the latest technological developments. Digitisation incorporated into the concept. The result is efficiency and sustainability.

Safe

This cartridge provides protection; your concentrate is secured, with no risk of leaks even if the screw cap is removed. This is guaranteed by a special valve. It only opens when the cartridge engages in the dosing device. Wrong product refilled? Can't happen. This is reliably prevented by an RFID chip. In other words, the correct concentrate with the correct RFID chip is required; this is the only way the dispenser will start running.

Calculable

integral 2GO HsM doses completely without fluctuation, this is what makes this system so special. The high-performance pump operates with the precision of a Swiss watch. In other words, the dose is always accurate. You buy a cartridge and know exactly how much cleaning agent you are getting for your money.

Less is more

Three concentrates are sufficient to cover 90 percent of your requirements in building hygiene. There are four further options, giving a total of seven cleaning agents. These cleaning products mean that integral 2GO HsM has every possible need covered.

Easy

Pictograms overcome every language barrier. Work is also made easier with a colour guide system. For example, the bathroom cleaner is red: the label is red, the high concentrate cleaner is red, and red is the colour of the finished application solution.

Efficient

The cleaning agent is produced directly on site by the dosing device itself. No need to lug heavy canisters from the storeroom. This saves space in the storeroom, as well as for freight purposes: there is an 80 percent water saving, meaning less water is carried by rail, road and air. At the same time, this reduces the CO₂ emissions.

Full Service

Any concerns regarding the technology are null and void with this package: Hagleitner proactively maintains the device whenever needed; the dispenser itself will provide all the information required. A technology check is performed once a year, with Hagleitner replacing wearing parts at any time as necessary.

Digital cleaning for buildings

Your data – Your benefit.

Hagleitner360 App

Control over keeping your building clean

Implement, manage and keep an eye on device settings – all at the flick of a wrist with your smartphone.

- Valuable dispenser data as well as information on the fill level and service requirements at your fingertips
- Implement device settings individually and as required

HsM Web Portal

All data – always available, anywhere

- All your historically collected data is available for detailed evaluations, enabling you to plan your resources efficiently.

Your dispenser data and much more is available from hsm.hygieneportal.com

sanitary 2GO

2 x 2,6 l

Art.-No. 4410200619

- Sanitary cleaner
- For daily maintenance cleaning
- For brilliant deep shine and long-lasting cleanliness
- Ideal for wet room cleaning (e.g. for the toilet, sink; for tiles, fittings)
- Ideal for pre-soaking mop covers and safetyWIPES (i.h.s. system)
- Can be applied by machine or manually
- Distributes a fresh and fruity lemon scent

sanitaryDES 2GO

2 x 2,6 l

Art.-No. 4410300619

- Disinfecting sanitary cleaner
- For daily maintenance cleaning based on natural lactic acid with 3-way effect: The product cleans, removes limescale and disinfects in just one step
- Universal usage in sanitary and spa areas
- Ideal for pre-soaking mop covers and safetyWIPES (i.h.s. system)
- Can be applied by machine or manually
- Bactericidal, levorucidal, limited virucidal effect
- Pleasant floral fragrance

hygienicDES 2GO

2 x 2.6 l

Art.-No. 4410300419

- Disinfectant surface cleaner
- Ideal for delicate surfaces
- Universal usage in spa and health areas
- Ideal for pre-soaking mop covers and safetyWIPES (i.h.s. system)
- Bactericidal, levorucidal, limited virucidal effect
- Approved and certified according to ÖGHMP/VAH

active 2GO

- Ideally suitable for soaking of mop covers (i.h.s. system)
- Can be applied by machine or manually
- For streak-free cleanliness, with fruity orange fragrance

greenovative

Sustainability starts where you begin saving resources. Haglëitner has been pursuing one philosophy for over 15 years: manufacturing concentrated products of the highest quality, reducing the transport of water to the absolute minimum and to protect the environment.

From a multiFILL cartridge with 2.6 litres
You can produce up to **1300 litres** – in other words, 1.3 tonnes of finished cleaning solution.

Translating this to 10 kilo canisters, this equates to 130 plastic canisters – or 2,600 plastic bottles (500 ml), which would have had to be produced, filled, transported, stored and disposed of.

Up to
95 kg less plastic,

up to
50 kg less CO₂

- 8 Start button for large container filling
- 9 Network and Bluetooth connections

i.h.s.

One-step cleaning with a systemised approach

How to clean efficiently in just one step: hygienic, effective, fast, cost-effective and sustainable.

Done in no time

Open the mop, wipe, finished. Just one step. No dunking. No squeezing out. No pouring away. No refilling.

No transfer of germs

New room, new mop. The fresh mop cover replaces the used one. This means that neither dirt nor germs are passed from one area to another.

Cost-effective and sustainable

60 l is needed for 500 m² in traditional mopping, but just 6 l with i.h.s. One-tenth of the cleaning solution means one-tenth of the water and one-tenth of the sewerage charges. Efficiency and sustainability go hand in hand.

Transparent

Dispensing quantity, dose, consumption, refill cycle, service interval: The dosing device provides digital self-reporting. This makes the future plannable.
