

Innovative Hygiene.

Eco-certified products

... because it's vital for the environment

✦ Hygiène Control
Benelux

Digital instead of printed

We're just going ahead ...

... less paper with digital brochures

Greenovative® is Hagleitner's sustainability strategy. Raw materials are eco-certified, highly concentrated formulas save plastic, system refills reduce emissions, plastic is recycled, dispenser data conserves resources. Energy-efficient production is carried out at one location – in Zell am See (Austria). Sustainability, digitisation and innovation are intertwined, resulting in Greenovative hygiene. The Greenovative Circle from Hagleitner proves that sustainability in practice works as an integrated whole.

That's why we're increasingly replacing printed paper documents with digital ones.
